

LED ON-BOARD LIGHT – THE DEDOLIGHT MINI DLOB

A SINGLE, HIGH-POWER LED

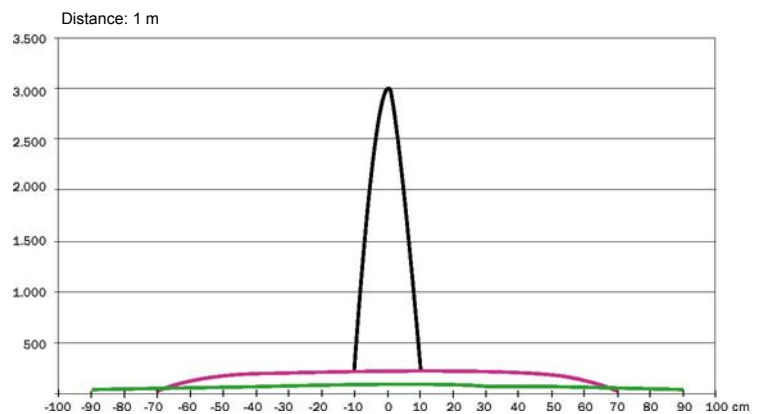

- **Amazing output** in combination with the Dedolight double aspheric optics
- **Focuses** like a Dedolight. LED lights are not usually focusable.
- No other focusing LED light compares - 4° to 56°
- **Smooth** light distribution in all and every focusing position
- Wide-angle flip-up diffuser for 70° angle, smoothly covering the widest zoom and widening the beam more horizontally than vertically (1:1.66). After all, we don't shoot round pictures...

Cat.# DLOBML

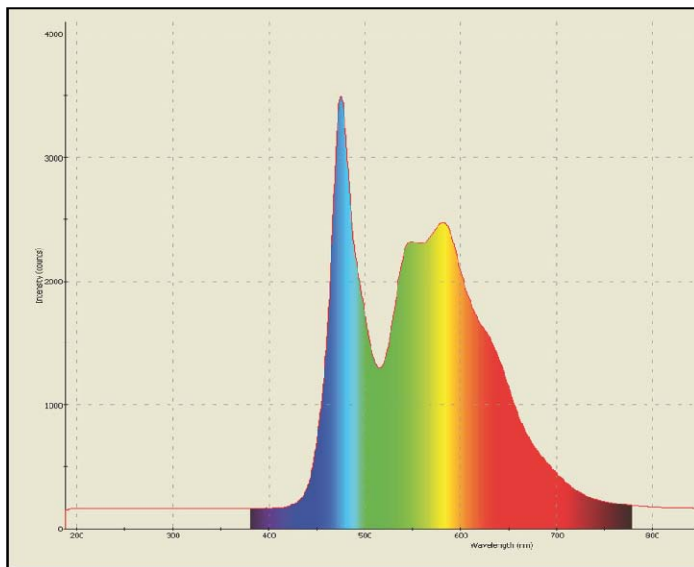

- Clean, sharp, single-edge barn door shadow OR a very gentle light and shadow transition with the flip-up wide-angle diffuser in place
- Converts from daylight to tungsten via a dichroic flip-down filter
- Color rendition and color distribution is cleaner than comparable LED lights

- Adjustable support arm allows it to be positioned above and forward, of the camera.
- Dims extremely smoothly from full blast all the way down to zero without any color change.
- Powers from any 6V to 18V DC power source.
- Optional battery shoe is compatible with Sony and Panasonic mini-DV batteries:

NP-F550 7.2V, 2000mA, 105 minute run time.
 NP-750 7.2V, 4000mA, 210 minute run time.
 NP-F950 7.2V, 6000mA, 330 minute run time.

- When dimmed to 50% light output, power consumption drops accordingly resulting in twice the run time. Alternative power from any Anton/Bauer or PAG system, car cigarette lighter output or battery belt.
- Power consumption is only 8W despite its high output.
- Operates from -40°C up to +40° C.
- LED power available indicator.
- Front-end bayonet allows you to add future attachments and light modifiers.
